2 Status of Deliverables

Upcoming - to be delivered when they get here and not a moment too soon.

3 Plans For Next Month

Anniversary (14 years!) Birthday (ninth anniversary of 29th birthday!)
LCG2 and support of DC04.

4 Longer Term Plans

Buy a farm. Raise and grow heirloom vegetables and heritage livestock (turkeys and what-not), perhaps put in a shrimp farm. Sell the above mentioned goods to high end restaurants looking to have unique local flavors on their menus. (Okay, shrimp really aren't that local to the midwest - but they are a big seller.)

Have at least one more child.

Poke myself in the eye with a sharp stick after the last child is born. It will be less painful than sending the previous group of children to college.

Attain wisdom before people think I'm too dotty to be taken seriously.

Write a book of wise sayings that will spawn a small feel-good industry. Like "Cajun/Creole Chicken Sausage Gumbo for A System Administrator's Soul" or "The UPS Box."

Become dotty.

5 Resources Needed

I am not asking for chocolate because nobody EVER brings me any, even though they spend gobs and gobs of time on the continent that essentially INVENTED chocolate confections. I don't need them. I can become diabetic all by myself on Hershey's Dark Chocolate Kisses.
